

OVERVIEW

The HP series are LED downlights that contain many features and options that will make them the right choice for your lighting application. With various sizes, trim options, light options, and control options, there is a well-suited light for any location. Our newest addition to the series allows for 3 colors with dimming through existing 2-wire installations. A great option for refitting with modern LED lighting, while keeping things cost effective without needing expensive re-wiring jobs.
